1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

*Election/Restrictions*

2. Applicant's election without traverse of Species I (shown in Figs. 1-3) in the reply filed on June 9, 2003 has been acknowledged.

*Claim Objections*

3. Claims 1 & 10 objected to because:
  - a. Claim 1 recites the limitation "said cup-shaped elastomeric member" in line 8. There is insufficient antecedent basis for this limitation in the claim.
  - b. Claim 10 recites the limitation "said low friction member". There is insufficient antecedent basis for this limitation in the claim.

*Claim Rejections - 35 USC § 112*

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1, 3-5 & 10-12 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant

art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant has not pointed out where the following limitations are supported, nor does there appear to be a written description of the limitations in the application as originally filed.

- a. Claim 1, line 7: "a cup-shaped outer member"
- b. Claim 1, line 9 "a cup-shaped elastomeric member"
- c. Claim 1, line 9: the elastomeric member defining . . . "a fully open end"

*Claim Rejections - 35 USC § 102*

6. Claims 1, 3, 4 & 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Mackovjak, US 4,721,325. Figs. 1 & 5 shows a pivot joint comprising an inner member 100 having an outer surface and an end surface generally perpendicular to the outer surface; an elastomeric member 60 disposed around the inner member, the outer surface and the end surface of the inner member 100 being rotatable within the elastomeric member 60; and a cup shaped outer member 80, 81 disposed around the elastomeric member, the elastomeric member 60 defining an outer wall, a closed end and a fully open end, the cup-shaped elastomeric 60 being fixedly secured to the outer member, the outer wall being disposed opposite the outer surface of the inner member 100 and the closed end being disposed opposite the end surface of the inner member 60.

*Response to Arguments*

7. Applicant's arguments with respect to claims 1, 3-5 & 10-12 have been considered but are moot in view of the new ground(s) of rejection.

*Conclusion*

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
